

AWS CDK

TypeScript

```
sample-db.ts

const saasTable = new awsDynamodb.Table(scope, 'SaasTable', {
  tableName: `SaasTable`,
  billingMode: BillingMode.PAY_PER_REQUEST,
  partitionKey: { name: 'id', type: AttributeType.STRING },
})
```

```
sample-bucket.ts

const fileStorageBucket = new s3.Bucket(scope, `my-bucket`)
```

What **AWS** Services Do
Most SaaS Apps Need?
