Auth: Amazon Cognito

- 50,000 MAUs for free each month
- Highly customizeable
- Fully Managed

```typescript
const userPool = new awsCognito.UserPool(scope, `userpool`, {
  userPoolName: `my-userpool`,
  selfSignUpEnabled: true,
  lambdaTriggers: {
    postConfirmation: props.addUserPostConfirmation,
  },
  accountRecovery: awsCognito.AccountRecovery.PHONE_AND_EMAIL,
  userVerification: {
    emailStyle: awsCognito.VerificationEmailStyle.CODE,
  },
  autoVerify: {
    email: true,
  },
  standardAttributes: {
    email: {
      required: true,
      mutable: true,
    },
  },
});
```

```
import { Amplify } from 'aws-amplify';

import { Authenticator } from '@aws-amplify/ui-react';
import '@aws-amplify/ui-react/styles.css';

import awsExports from './aws-exports';
Amplify.configure(awsExports);

export default function App() {
  return (
    <Authenticator>
      {({ signOut, user }) => (
        <main>
          <h1>Hello {user.username}</h1>
          <button onClick={signOut}>Sign out</button>
        </main>
      )}
    </Authenticator>
  );
}
```
